

To Whom It May Concern,

Our company experienced issues with internet phones from a provider in the Fort Wayne area. We reached out to Applied Technology Group to assist in solving the problems with a new phone solution in 2018. The conversion was extremely simple, and we experienced little to no downtime with our phone system. ATG technicians installed at all sights within a day with no interruption to our business. Support has been great when needed with quick response from ATG representatives. This company is respectful and attentive to their customer needs.

Regards,

Melissa Bunting
