

To whom it may concern;

Covenant UMC, a larger United Methodist church that relies heavily on technology to deliver its message to those seeking Christ, needed to find a managed IT company able to take over and manage its technology. We gathered quotes from various companies and Applied Technologies Group had the quote that fit our needs at the competitive price.

They have been very respectful of the needs of the church to stay online and in contact with the people it serves. Problems have been found and fixed swiftly. Calls for support have been answered quickly and the solutions have been timely and efficient. ATG is handling all our needs from computer maintenance and network support (including church wide WiFi) to software support and updates. We are very pleased with their people and solutions.
